

An Dynamical Systems for Biological Modeling: An Introduction

By Fred Brauer, Christopher Kribs, Louis J. Gross, Suzanne Lenhart, Philip K. Maini

Taylor & Francis Ltd. Hardback. Book Condition: new. BRAND NEW, An Dynamical Systems for Biological Modeling: An Introduction, Fred Brauer, Christopher Kribs, Louis J. Gross, Suzanne Lenhart, Philip K. Maini, Taking more of a qualitative rather than computational approach, this text presents the techniques required to undertake basic modeling of dynamical systems through the development and analysis of dynamical systems. It includes many different types of applications from population biology and epidemiology. Keeping technical details to a minimum, the text only requires a basic understanding of calculus. It provides examples of problems with solutions followed by exercises to reinforce the examples. Many of the problems are somewhat challenging so as to encourage a deeper understanding and prompt the use of mathematics in learning about biology.

Reviews

Without doubt, this is actually the greatest work by any writer. It is actually writter in simple terms instead of confusing. I found out this ebook from my i and dad recommended this pdf to understand.

-- **Kristy Dicki**

The publication is great and fantastic. It is packed with knowledge and wisdom You will like how the article writer publish this publication.
