

Signal Transduction in the Cardiovascular System in Health and Disease (Advances in Biochemistry in Health and Disease)

Filesize: 1.95 MB

Reviews

The publication is easy to read better to understand. It is written in basic words and phrases rather than hard to understand. You won't truly feel monotony at anytime of your respective time (that's what catalogues are for about if you question me).

SIGNAL TRANSDUCTION IN THE CARDIOVASCULAR SYSTEM IN HEALTH AND DISEASE (ADVANCES IN BIOCHEMISTRY IN HEALTH AND DISEASE)

Springer, 2008. Hardcover. Book Condition: New. Signal Transduction in Cardiovascular System in Health and Disease Madhu B. Anand- Srivastava and Ashok K. Srivastava This book has addressed the contributions of several key signal transduction pathways which are central to our understanding of cardiovascular physiology and pathophysiology. Aberrations in these signaling events have been suggested to be involved in a host of cardiovascular pathologies, such as cardiac arrhythmias, congenital heart failure and hypertension. All the chapters have been written by well known leaders in the fields, which cover a wide range of intracellular events that regulate various aspects of cardiovascular functions. This book will be of interest to both basic as well as clinical scientists seeking to understand the molecular basis of cardiovascular diseases, and also to those interested in defining targets for cardiovascular pharmacotherapy. About the Authors Dr. Madhu B. Anand-Srivastava is a Professor, Department of Physiology, and a member of the Group de recherche sur le systSme nerveux autonome, University of Montr,al. In 1990, she received a prestigious Scientist Award from Medical Research Council of Canada and in 2004, she was bestowed with the Vincenzo Panagia Distinguished Lecturer award from the Institute of Cardiovascular Sciences of the University of Manitoba, Winnipeg. She is an internationally recognized expert in the area of G-protein and natriuretic peptide receptor-C signaling, and has made significant contributions in defining the role of Gia proteins in the pathogenesis of hypertension. She has published more than 125 papers in refereed journals and edited 3 books in the area of G-proteins, hypertension and NPR-C receptor and cell signaling, and has been invited to several National and International conferences and academic institutions to present her work. Dr. Anand-Srivastava has served or is currently on different committees of the Canadian Institutes of Health Research and Heart and Stroke Foundation...
